

CAREER OPPORTUNITY: SENIOR iOS SOFTWARE ENGINEER | SAN DIEGO |

Echo Laboratories is a flourishing startup dedicated to improving microscopy. We love working with brilliant people to create, build, and promote the best products in our industry.

As a Senior iOS Engineer at Echo Laboratories, you'll build and maintain the iPad app that powers our revolutionary new microscope. Along with writing code, you'll use your knowledge of mobile technology to solve customers' problems and continue driving innovation in research microscopy.

THE JOB:

- Design, write, and ship maintainable code for our iPad app
- Ensure software stability through best practices and testing
- Continuously improve our software development process
- Collaborate with our internal teams to define new features

THE CANDIDATE:

- 5 years of iOS development experience, 10 years in software development overall
- Has shipped one or more iOS apps in the App Store. Additional bonus for productivity and multimedia apps.

EDUCATION and EXPERIENCE:

- Bachelor's degree in Computer Science or equivalent
- Proficient in Swift, with knowledge of Objective-C, C, C++, and Python
- Knowledge of Apple UI technologies, such as UIKit, AutoLayout, and Interface Builder
- Knowledge of Apple frameworks such as Core Image, Core Animation, Core Graphics, AVFoundation, vImage
- Strong debugging skills
- Experience with profiling tools such as Instruments
- Understanding of client/server communication and concurrency
- Solid understanding of the software development lifecycle
- Experience with writing unit and UI tests
- Experience with source control, such as Git, and bug tracking tools

WHAT WE OFFER:

- Early employment at a rapidly growing company that offers employee stock ownership
- The opportunity to join an incredible team and to have an immediate impact on the success of the company
- Competitive Compensation including Medical, Dental, and Vision Insurance
